

# TIS

## Thermite Initiated Starter

The TIS is the recommended initiator for all Disarmco's thermal products. DISARMCO offers Thermite Initiated Starter (TIS), as an uncomplicated, safe and cost effective, pre-assembled electric starter.

TIS is not classified as an explosive therefore, it is easy to transport, handle and store.

### ELECTRICAL REQUIREMENTS

The TIS has been designed to be fired by exploders commonly used within EOD, it requires at least 350V @ 6 Joules. It is recommended that the firing cable resistance should be less than 12 Ohms. The coiled firing wires are extended before deployment.

### ADVANTAGES OF TIS:

- TIS is classified as a flammable solid, certified under UN3178 Hazardous Class 4.1, UN Packing Group III – Flammable Solid Inorganic N.O.S.
- Safe to transport as a UN3178 classified item.
